

RSTX 100

The remote control for
AUMA actuators

auma®

Safe operation at any
point in your plant's
life

RSTX 100

The remote control by AUMA is your reliable companion throughout the everyday plant life. Use the remote control to conveniently operate your AUMA actuators from a safe distance.

Rugged

Robust materials ensure a long lifetime during the tough everyday plant life

Intuitive

Intuitive operation due to clear menus and self-explanatory texts

Legible

High resolution colour display with key backlight provides a clear picture where light is scarce

Accessible

Operation from a safe distance thanks to a 20-metre Bluetooth range

Safe

Ex ia certified means additional safety for the on-site staff

Ergonomic

A safe grip and easily operable buttons – even when wearing gloves

For AUMA

firmware update

Simple and safe
**actuator configuration
and parameter setting**

Simple and safe **actuator control** and
end position setting

CORALINK
Expert care for your actuators

The remote control is your comfortable interface to CORALINK, the digital ecosystem by AUMA.

With CORALINK, you can analyse the diagnostic data of your actuators for predictive maintenance. Use CORALINK to increase the efficiency of your processes and ensure reliable operation of your plant.
