BOSUNS WORK POSITIONING SEAT

RGP-5-1

The RIDGEGEAR bosuns work positioning seat is a lightweight work-at-height accessory designed for improved comfort and support when suspended.

The seat can be attached directly to the ventral attachment point of a rope access type harness, or the integrated attachment points of the RIDGEGEAR RGH17 rope access harness using suitable connectors.

A comfortable addition with a padded seat to support the user's weight more evenly than using their harness alone. It reduces pressure on the body, protecting against fatigue and enabling improved focus on prolonged tasks.

Not to be used as PPE.

- 20mm webbing - less cluttered area
- Webbing tool attachment loops - less weight and no metal-to-metal connection
- Rear webbing loop - store when not in use
