04-2025

see technical data

Weldotherm annealing and preheating elements are extremely robust and stable multipurpose heating elements.

The high quality of the aluminium oxide ceramic (96%) used and the heating wire materials (NiCr 80/20) has been proven in years of use on the toughest job sites.

The application limit is max. 1050°C.

The application range includes circumferential welds, flange welds, connecting piece welds or area heating.

The connected load is **60V AC / 45A / 2.7kW**.

All heating elements are offered standard-wise including „DINSE“ plugs. The „CAMLOCK“ system is available on request.
